Wilco Intec's Donation

Wilco Intec fulfils its Corporate Social Responsibility by making a donation to Bethel Association in China. This association is a not-for-profit organization that provides foster care, education and professional training for Chinese orphans who are blind. With this donation, it was possible for the Association to set up the cooling and water heating system for the blind Chinese orphans' homes.

Sport

Bourges Basket: Dream Team!

For the 4th year, Wilco Intec is the partner of the Bourges' Basketball female team (winner of the French Championship in 2009).

Come and enjoy the matches!

Product

Stratos TEC ST

After the launch of the benchmark setting Stratos TEC standards beginning of this year (efficiency up to 50%!), we are glad to present you now the dedicated **solar version** Stratos TEC ST.

It uses the same optimized motor technology as the Stratos TEC while the pump housing and the electronic meet the specific solar requirements: the adaptation of the hydraulic curves together with the robustness against higher liquid temperatures & solar water hammers were the main drivers for this pump development.

If you are eager to know more about it, please contact our sales team!

Communication

Catalogue New Release

Wilco Intec is proud to release the latest version of its product catalogue.

With over 20 product ranges, this 90 page catalogue is being hailed as the company's best ever!

Featuring a new application-oriented layout, this 7th edition makes your OEM product selection easier whilst keeping pace with the latest technological developments.

Please enjoy the aesthetic experience of a facilitated navigation – check out the new exploded views!

With many new products including significantly expanded high-efficiency pump ranges, this up-to-date catalogue shows our comprehensive choice of solutions that meet the demands of most customers requirements.

International OEM Sales Meeting

Although the heating industry is facing unprecedented turbulent times, Wilco Intec has maintained its annual International OEM Sales Meeting in Aubigny on September 24th concentrating the participant list to a limited sphere of 20 influent actors.

Discussions were based on:

- ✓ the new market segmentation aiming at enhancing our relationship approach to marketing;
- ✓ a dedicated benchmark of competitors' offerings;
- ✓ our subsidiaries' expectations

Specific OEM workshops over new regulations (e.g.: EuP & impact on renewable solutions), new products, spare pumps, catalogue, our service offers, took place that day.
