

Greetings

2006 ...

It is with great pleasure and sincerity that we wish to all our customers and partners a happy New Year full of success and very good health.

Seasons greetings !!!

Sport

An ice skating rink in Aubigny !

Wilo Intec, with the collaboration of the Council of Aubigny sur Nère, is sponsoring a new animation during the winter.

A real succes and a lot of fun for the young people of the region !

Events

An impressive international network

On the 24th of November 2005, Wilo Intec invited selected key players of the heating industry to participate to the second Wilo Top. The event gathered 35 people in a prestigious palace in Paris.

Experts made different presentations on the following topics :

- > Looking for new opportunities – “Chindia”
- > Setting up a subsidiary in Eastern Europe
- > Impacts of the changing regulation in UK
- > Further savings in the heating business
- > ...

A very successfull evening thanks to the quality of the participants. Ready for next year ? ...

Products & services

Boiler Identity Card

Do you know how your boiler compares in terms of acoustics ?

Wilo Intec installed a robotic controlled semi anachoid chamber, has tested hundred of boilers and keeps feeding a comparative database of results. For each boiler tested a complete Boiler Identity Card is created. This way, you can see how your boiler compares to the market. Wilo Intec, your solution provider.

The latest composite sanitary pump

First in the market, Wilo Intec is launching the new composite sanitary pump (CPS) made out of high performance thermoplaste. Withstanding sanitary hammer shocks 10 times higher than required in heating application, this pump is a successful common development of our Advanced Research Center in Dortmund and our technical staff in Aubigny.

It is also a practical application of the Wilo BIONIC approach. BIONIC means learning from nature by designing more robust geometries (for example, understanding how trees can resist to 150 km/h storms) You want to know more...please feel free to contact our technical department for detailed information about this interesting approach...

Award

Wilo Intec Laureate of the National Quality Award

On the 5th of December 2005, at the Ministry of Industry, Economy and Finances, the company Wilo Intec, has been made a Laureate of the National Quality Award in the category Group Subsidiary.

An impressive evolution for Wilo Intec, which after having received a mention at the prize quality of the Center Region in 1998, was first in 2003 at this same prize, in 2004 was part of the finalists of the National prize, and finally reached the French Prize of Quality at National level !

The prize was handed to Gilbert Faul (President of Wilo Intec) by Mr Luc Rousseau General manager of the DGE (General Companies Management) representing the deputy Minister of Industry François Loos, but also with the presence of Frederic Jodin President of the French Prize of Quality, Pierre Gosset President of the French Movement for Quality (MFQ) and Didier Lombard President of France Telecom.

After such an award, we even find ourselves dreaming of a European prize of quality, the EFQM. Ready to take on this new challenge ...?!!!!
